

Spotlight on NVLD Research

The NVLD Project contributed to the funding of a new paper published last month in *Developmental Science*. This publication shows how verbal-spatial discrepancies, the core feature of Non-Verbal Learning Disability, affects executive functioning. At this time, only the abstract of the article is available to the public. Read more [online](#).

Dr. Amy Margolis, first author of the above paper, was featured in an ADDitude webinar on NVLD that you can replay [here](#). Dr. Margolis is the Principal Investigator of the [neuroimaging study](#) of children with NVLD sponsored by The NVLD Project at Columbia University Medical Center.

Community outreach by our Advisory Board

Board members, Dr. Antoinette Lynn and Bob Cunningham, are currently conducting a series of workshops with educators from the [Ethical Culture Fieldston School](#). They are presenting best practices to improve the social experiences of all middle and high school students.

Learning specialist and Advisory Board member, Abby Diamond, recently shared her strategies to help students with NVLD on our [blog page](#).

Our website also features a new Q&A page where our experts answer your questions about NVLD. Read their answers at the end of each month [on our website](#).

Our one year anniversary

This month, we are celebrating our one year anniversary launch of The NVLD Project's website! We need your help to expand our outreach further. 100% of your donation will support research, educational workshops and community outreach. Can we count you in?
